Brand Heart

Brand Story

The story of Parallel Analytica is a story about empowering small and medium sized businesses (SMBs) with knowledge about data collection and data solutions that meet their unique needs. SMBs face many barriers to adequately collecting data: dealing with the daily tasks of running a business, little to no formalized processes for data operations and regularly having to change business strategy - and thus data strategy - to continue growing. We see a chance to help SMBs minimize the mystique and headache of data collection and maximize their business success.

Our story began in 2020 when we realized the serious need for data optimization among SMBs. We brought our passion for data science and our respect for gritty SMBs together to provide this service. That's when we founded Parallel Analytica.

We know data is the future and we're ready to listen to clients, address their problems and find the exact solutions that will help them to take control of their data.

Some companies have mastered data collection over recent years, some dabble with popular data analytics tools, and others avoid data altogether. We see an opportunity to put our values into action and create processes for SMBs to become more comfortable with their data situation, to solve their unique data problems, and set a trajectory for data success for their business.

Our legacy is one of empathy and earned authority. These core values are what will guide the evolution of Parallel Analytica and power our desire to make data more operational for more businesses.

Brand Purpose

To provide scalable and efficient business optimization solutions using data engineering, data analytics, and data science.

Mission

To meet clients where they are, listen to their needs, and move them to be more data-driven.

Vision

Clients empowered with new understanding and operations of data solutions that are right for them, increasing their business success.

Brand Values

Empathetic

We understand that small and medium-sized business owners are always busy and wear a lot of hats. We meet clients where they are with their understanding and use of data. We create a plan for collecting data that can easily fit into their day-to-day operations.

Educational

Parallel Analytica educates clients about the many options they have to collect data and keeps them up to speed with the constantly-evolving world of data science, data analytics, and data engineering.

Authoritative

Our customized data engineering and analytics utilize the most up-to-date and best-in-class business intelligence practices. We stay at the forefront of data and support our clients with the best solutions available today.

Audience

Customers/Prospects

Our customers are our #1 priority and we build our business to maximize their benefits and their understanding of data.

Media

We work with media sources and take opportunities to reach more business owners that want to start or refine their data collection.

Analysts/Engineers

We want to attract analysts and engineers that specialize in the tools we use. This could be an organic way of recruiting while establishing our reputation in this space.

Brand Platform

Brand Promise

Deliver resources and processes to each unique customer to achieve scalable and efficient business optimization solutions using data engineering, data analytics, and data science.

Brand Positioning Statement

For business owners who want to establish the most effective data collection for their business, Parallel Analytica is the best service to understand their situation and meet their needs.

Audience & Tone

Who is Our Audience?

Our audience is small and mid-sized businesses (SMBs) with no in-house analytics team and/or data warehouse. These prospects are performing SEO and searching for analytics or database services. More specifically, we speak to company presidents, executives, marketing representatives, and/or operations representatives. Typically, we speak with individual prospects.

What is our Tone of Voice?

Our tone is casual, authoritative, and understanding. Our voice is optimistic and educational.

How We Do It

We are confident and conversational, but emphasize the importance of listening.

Brand Messaging Pillars

The core set of beliefs that we offer our audiences. No single pillar defines our brand, but the unique blend of our pillars set us apart. The pillars inform the substance of our brand message.

Made for SMBs

Our business is built to meet the array of different needs of budding business leaders and launch them into success with data.

Reliable Partner

Parallel Analytica is a reliable partner and supports varying data analysis needs. We listen and understand complex or murky situations. We provide ongoing support and clearly written documentation. We organize information in a clear concise graphical manner.

Unlocking a New Level of Strategic Thinking

We inspire our clients to elevate their business strategy. We address client goals by unlocking a wide range of data and focusing on specific information that can be tracked to achieve those goals.

Brand SEO Priorities

The following SEO keywords are of high importance for Parallel Analytica and should be prioritized in content creation and branding.

1. Data analytics
2. Data engineering
3. Businesses data
4. Using data analytics
5. Businesses using data analytics

Brand Guidelines

Messaging

Core Value Propositions

They represent the most important offerings Parallel Analytica provides to our customers. This is what we should focus on communicating every chance we get.

Always Up-to-Date

Our customized data engineering and analytics utilize the most up-to-date and best-in-class business intelligence practices.

Driving Processes and Growth

Paired with our insights and strategic recommendations, our bespoke enterprise solutions increase business intelligence using the client's company data, which leads to process improvements and organizational growth

Empathetic

Our proven track record is the result of the empathy we have for our clients' needs and organizational issues. This leads to increasing ROI (return on investment), LTV (lifetime value) & CAC (customer acquisition cost).

Brand Identity

Welcome to Parallel Analytica.

There are many different solutions and methods to aggregate and analyze data for business. Data continues to become more important and valuable, yielding endless opportunities to grow a SMB. Our brand represents both our confidence as well as the awareness we apply to empower businesses to take control of their data to grow their business. It's the inspiration in our vision, the authority in our language, and our constant learning that propels us forward.

Voice & Tone Overview

Our Voice & Tone is a set of foundational elements meant to guide the creation of written collateral for the brand. These are standards through which we express our brand's essence and create work that sounds unmistakably Parallel Analytica.

Our Voice is behavioral, our verbal hallmark and it's how we would sound if Parallel Analytica was a person.

Our Tone is the framework for how we speak within different contexts depending on whom we're speaking to, where and about what.

Voice

Optimistic

Our outlook, we believe in the possible.

We see the potential in our work to expand the knowledge of data collection and grow our client's business. We think there is a lot of untapped opportunity in our client's data and we're confident we can empower them to harness it.

Empathetic

Our drive, we identify paths forward together.

We believe in ourselves and our clients. That translates into the confidence to take on the challenge of creating new processes and data goals. We're measured in our approach and always looking to honor the unique needs of each client.

Authoritative

Our philosophy, we bring the expertise our clients need.

Parallel Analytica is a reliable analytics vendor that unlocks a new level of strategic thinking for our clients. We answer why businesses should invest in data analytics for growth. We support businesses to understand the concept of data analytics before integrating it into their business strategy. We empower clients to compete with competitors that are already investing in data analytics.

Tone

Below is a framework for Parallel Analytica's tonal range and how it reacts to various situations and contexts. Our default tone is casual, authoritative, and understanding. When talking about technical things, our tone is simplified and educational.

Most communications will be covered in our default tone, however our tone does vary situationally and should be cast according to the audience's state of mind. Our tonal range allows us to be more formal within our products and more friendly and energizing when speaking with potential customers or influencers.

Parallel Analytica Tonal Scales

Formality		
Friendly	Casual	Determined
Casual but not overly familiar. This tone is likely best suited for communications like a social post for a blog or a data-related news item	A default conversational tone. Not insistent on formality, but don't use slang either. Imagine your exchange with a barista you don't know.	Our Business tone. Not orthodox, but certainly more dignified than casual. Used for important communications or resources.

Emotion

Assuring	Balanced	Energizing
Our “don’t worry, we’ve got this” tone. Use this for communications that need to inspire or address concerns.	Our general-use emotional tone. Engaging, slightly upbeat, and with optimism.	This is for when we’re excited or celebrating. We’re always optimistic, but this is where we let our enthusiasm really shine through.

Technical

Layman	Simplified	Detailed
This is for boiling down technical speak to its absolute most basic. We emphasize “educational.”	We explain jargon when necessary. We provide context so prospects can read between the data lines.	This is our tone mostly for business communications.
